📁 Projects

SolidStocks  06/2023 – 06/2023 | Ulm, Germany

- Developed an Angular 16 website with router navigation, reactive forms, HTTP services, and Highcharts integration for data visualization.
- Utilized ngx-pagination and RxJS for efficient data handling and injectables for enhanced modularity.
- Ensured optimal styling using Tailwind and SCSS, with a cache storing mechanism for improved performance and user experience.

BMW Clone  06/2023 – 06/2023 | Ulm, Germany

- Recreated BMW homepage with SCSS, and made jQuery keyboard controls.

Gotel  06/2023 – 06/2023 | Ulm, Germany

- Created a sophisticated hotel booking website with React.js, responsive flexbox layouts, and a captivating carousel on the landing page for exceptional user experience.

SweetMarket  06/2023 – 06/2023 | Ulm, Germany

- Sweet Market, a personalized shopping site centered on sweets, features 5 pages for a seamless user experience. Built with Vue.js and Tailwind CSS, it offers user authentication, cart management, and smooth routing, providing a delightful shopping experience.

📄 Certificates

Frontend developer Certificate  (from FreeCodeCamp)
