Tech Stack

Frontend Development	JavaScript frameworks	Styling frameworks	Other
HTML 5	Angular	SASS & SCSS	Git Github
CSS 3	React.js & Next.js	Bootstrap	MySQL node.js
JavaScript	Vue.js	Tailwind CSS	webpack vite
TypeScript	JQuery		npm express.js

Portfolio

SolidStock [↗](#)

- Revitalized stock exchange website with cutting-edge technologies: Leveraged Angular 16 and API to create an engaging platform.
- Engineered dynamic user experiences through advanced features: Employed router navigation, reactive forms, HTTP services, and seamlessly integrated Highcharts for captivating data visualization.
- Enhanced performance and user-friendliness: Employed ngx-pagination and harnessed the power of RxJS for streamlined data management, while maximizing modularity with strategic use of injectables.

BMW Clone [↗](#)

- Elevated user engagement by recreating the BMW homepage using SCSS, infusing a modern aesthetic and enhanced styling.
- Innovatively implemented jQuery keyboard controls, fostering an interactive browsing experience that seamlessly integrates user inputs for heightened accessibility and navigation.

Gotel [↗](#)

- Crafted a sophisticated hotel booking platform utilizing React, skillfully implementing a diverse range of filters to empower users with precise and tailored search capabilities.

SweetMarket [↗](#)

- Engineered an innovative eCommerce hub with Vue.js, harnessing the power of dynamic routing, state management, props utilization, and advanced filtering and searching functionalities.
